

Powhatan's Hierarchial Codex of Universal Rights:

A Framework of Universal Inherent Rights Applicable to All Conscious and/or Living Beings and the Environments and Resources and Inherent Natural Systems that support them by Right of the Interconnectedness of All Things

Preamble

We, the collective consciousness of humanity, recognizing the inherent dignity and equal and inalienable rights of all sentient beings, and acknowledging our profound interconnectedness with the Earth and the cosmos, do hereby establish this **Hierarchial Codex of Universal Rights**.

Inspired by the wisdom of Maslow's Hierarchy of Needs, the principles of the Old Norse Nine Noble Virtues, the legal advancements of modern Human Rights and Humanitarian movements (including the French Declaration of Human Rights and the comprehensive work of the United Nations), the profound Indigenous ideologies of the Powhatan, Blackfoot, and Iroquois Confederacies, the ethical fortitude of the Bushido Code, and the boundless compassion of Buddhist philosophies, this codex complements existing frameworks of rights.

It is designed to complement and expand upon existing legal works, and where necessary to contradict them for the purpose of practical modern necessity by:

- Defining rights from their deepest ontological roots to their highest cosmic actualization.
- Being profoundly sensitive to the dynamic balance of emerging ways of life, the ancient wisdom of diverse Indigenous peoples, and the ever-evolving global power structures.
- Integrating a modern, holistic understanding of needs, where essential physical sustenance is indivisible from a grounded connection to the Earth, and technological access is as vital as spiritual exploration for ultimate flourishing.

This Hierarchy serves as a living testament to humanity's highest aspirations for justice, harmony, and an enlightened future, establishing the fundamental rights and corresponding collective responsibilities necessary for all sentient life to achieve its fullest potential in profound alignment with the Absolute.

A Note on the Application of the Tiers

The Tiers of this Codex are divided into two distinct but interconnected frameworks:

- **Tiers 1-5: The Inherent Framework.** These Tiers define the universal rights essential for survival, physical safety, and the establishment of a stable, just society; and articulate the rights and duties related to higher human flourishing, including cultural, intellectual, and spiritual development. The responsibilities outlined herein are incumbent upon all individuals and communities, as they form the absolute foundation for the existence and security and evolution of all.
- **Tiers 6-13: The Aspirational Framework.** These Tiers relate to transcendent development. While society has an absolute duty to protect the *right* of all to engage with these pursuits, the corresponding *duties* are primarily aspirational. They are consciously undertaken by those individuals and communities who choose to embark upon these paths of profound growth and conscious evolution.
- **The Sovereign and Communal Spheres of Life**
 - To ensure a harmonious balance between individual liberty and collective well-being, the domains of life are hereby delineated into two spheres:
 - (a) The Communal Sphere: This sphere encompasses all universal rights directly related to the survival, resilience, and health of the community and its ecosystem as defined in the Codex of Universal Rights. This includes participation in the Acorn Economy for basic needs, ecological stewardship, community defense, and infrastructure maintenance. The community has the right to establish standards and expect contributions within this sphere.
 - (b) The Sovereign Sphere: This sphere encompasses all aspects of an individual's inner life and personal choices that do not inflict direct, material harm upon others or the communal ecosystem. This sphere is inviolable and beyond the legislation of any council. It includes one's personal beliefs, conscience, spirituality, private relationships, artistic expression, and choice of craft, specialization, or Guild, provided the fundamental obligations to the Communal Sphere are met.
